

# FREE CRYPTO EVERY OTHER MONTH FOR 12 MONTHS

The Air Grab opportunity of a lifetime!

To coincide with the launch of Epicenter, on the 28th February 2021, the team at Epicenter will take a snapshot of the Epic Cash blockchain. Holders of Epic Cash on the 28th Feb can then participate in an Air Grab that will reward them the same number of ECR tokens as they are holding in EPIC. e.g. 1,000 EPIC = 1,000 ECR.

If you then decide to stake your ECR tokens with Epicenter, every other month for the following 10 months you will be able to participate in new token Air Grabs as Epicenter launches new components to its ecosystem. e.g. 1,000 ECR = 1,000 EMPL = 1,000 EON etc. It really is that simple!

## HOW DOES IT WORK?

Over the coming year Epicenter will launch at least six new tokens to grow the capabilities of the ecosystem. You can see a full list with planned launch dates below.

Epic Cash holders must have their EPIC in one of 3 places on Feb 28<sup>TH</sup> to participate in the Air Grab.

1. CLI wallet
2. GUI wallet
3. Vitex (in either the exchange or their own wallet)
4. Official Epic ERC20 token

EPIC held anywhere else, such as in these places on Feb 28<sup>TH</sup> cannot participate in the Air Grab:

1. Citex
2. Fast Epic (FEPIC)
3. Any other unofficial wrapped EPIC on other chains

On February 28th, the team will take a snapshot of the blockchain that will be used as the oracle of holdings.

We will then set up an Air Grab Portal where you will need to add your telegram handle, the number of EPIC you are holding and your ERC20 wallet address for the ECR tokens to be sent to (more details on this to come).

For those concerned about privacy, we don't want your name or your email address, but we might need to contact you on Telegram

in case we can't match up your claim to the snapshot. We won't be using your details for anything other than this one-off process.

On March 28th 2021, ECR tokens will be distributed to those who have made their claim.

To participate in further token rounds, you will need to stake your ECR tokens with Epicenter (more on how to do this nearer the date).

## WHAT IF I DON'T HAVE ANY EPIC CASH?

It's not too late to buy some. We're currently listed on a decentralised exchange called Vitex (vitex.net) where you can buy as much as you like.

## WHAT TOKENS ARE BEING LAUNCHED AND WHAT DO THEY DO?

### ECR

March 28<sup>th</sup> 2021

Utility and governance token of Epicenter ecosystem that gives you rights to participate in future token offerings and governance of the decentralized organization.

### EMPL

May 2021

Soft-pegged algorithmic stablecoin that rebases to \$1 value periodically, adjusting the in-wallet balances of users up or down as necessary – great for smart contracts where the value needs to be fixed.

### EON

July 2021

A smart contract platform that handles administrative duties within the ecosystem, tying the chains together.

### EDX

September 2021

Epicenter Dex utility token for fees, trade and get fee rebates.

### ECHO

November 2021

A token that stores the seeds of the content you create and share online. It allows you to own your own data and transact with others without big tech centralized systems and all the benefits that brings.

### EFX

January 2022

Epicenter Forex enables you to send any fiat to any fiat, through the blockchain, cheaply and instantly. No more \$45 wire transfer fees!

## WHAT IS EPIC CASH?

If you're not familiar with Epic Cash, head to <https://epic.tech> to find out more.

THE SMALL PRINT: You recognize and agree that we have made no implications, warranties, promises, suggestions, projections, representations or guarantees whatsoever to you about future prospects or earnings, or that you will earn any money or tokens, with respect to the ECR and subsequent air grabs, and that we have not authorized any such projection, promise, or representation by others. You recognize and agree that we have made no guarantees as to the timing of said air grabs.

Epicenter is a no ICO, no pre-mine, no VC community project represented by the ECR DAO, currently led by pseudonymous individual volunteer contributors known as the Freeman Family. Anyone can become a Freeman simply by creating a free profile on EpicFundMe.com so that others know how to pay you, since Epic Cash has no publicly visible wallet addresses, for improved privacy. Epicenter creates regulatory compatible digital assets that are designed to not be securities, under the guidelines established by the Crypto Rating Council. This is not an offer to sell securities, and ECR tokens require active contribution to participate. Token-holders play an active role in shaping the ongoing evolution of the ecosystem through their presence and engagement.

No admin will ever ask for your keys or your KYC information. No marketing will ever pollute your feeds. Epicenter respects privacy and the valuable limited time and attention of its users.

The best way to get Epic is not to buy it, it is to earn it, through mining or asking to be paid in it for the goods and services you provide to others. Epic Cash is a true P2P unstoppable electronic cash system according to the original Satoshi design, updated to the latest tech standards using Mimblewimble and Multi-Algo.

Epicenter Labs is hiring! If you have experience in Rust, React, Dfinity, Loopring, Hermez, Zksync, Solidity, BSC, HECO, Solana, Vite, gossip protocols, high assurance DevOps, secure multi party computation, or the aptitude to learn, say hi at labs.epic.tech - bounties available daily, which can lead to more permanent engagements. Epicenter is committed to high assurance free open-source software that adds immediate value to people's lives by adding value today, not years down the line.
