EPICENTER

PYRAMID WAKUNJA

While EPIC functions as a cryptographic store of value, its paired stablecoin, EUSD, functions as a medium of exchange.

The ECR token provides governance for the Epicenter ecosystem and provides a backstop for the EUSD exchange rate.

1 EUSD = \$1

 worth of Epic Cash

EUSD is an ERC20 token, implemented through smart contracts on the Ethereum blockchain. An EUSD holder is always guaranteed \$1 worth of EPIC, regardless of the current print.

Epicenter consists of 3 composable components:

1. EPIC CASH
PoW miblewimble coin

A store of value

2. ECR
ERC20 token

Ecosystem utility governance

3. EUSD
ERC20 token

Algorithmically soft-pegged to the US dollar

GROWTH:

New dApp assets planned for release to drive DeFi utility and users

Supported by Epicenter Equity Corp, a privately held, for-profit organization that facilitates EUSD/USD conversion through capital and liquidity provisioning in unison with partners.

With EPIC / ECR / EUSD as the core, DeFi applications are easily layered on top. Several are already under development, with multiple releases scheduled for the coming quarters.
